- **Frontend**: React, TailwindCSS, HTML, CSS, Bootstrap, Laravel Blade Templates
- **Frameworks**: Laravel, (Frontend structure, Blade, Routing)
- **Database**: MySQL, SQL, SQLite
- **Design Tools**: Figma, Adobe XD
- **Deployment**: Vercel, Netlify
- **Other**: Responsive Design, Laravel File System, MVC Architecture, UI/UX Best Practices

PROFESSIONAL EXPERIENCE

Alright Tech

Front-end Developer | Team Lead (Jan 2024 - Present)

Potolo

Technology: HTML, CSS, Bootstrap, JavaScript, Laravel

- Developed Potolo, a centralized web platform offering multiple digital services under a single ecosystem.
- Launched Potolo Super Markett as the first fully functional service with responsive UI and seamless UX.
- Designed modular architecture to support future services like Potolo Restaurants, Potolo Grocery, and more.
- Built dynamic frontend using Bootstrap and JavaScript, ensuring cross-device compatibility.
- Utilized Laravel for scalable backend development, managing routing, service modules, and user authentication.
- Upcoming services are structured under a "Coming Soon" module, ready to scale as Potolo grows.

Sign IN Track

Technology: HTML, CSS, Bootstrap, JavaScript, Laravel

- The purpose of "Sign Track" is to allow users to sign documents digitally from anywhere in the world, eliminating the need for physical presence and streamlining document processing.
- The platform offers both a free trial for new users to explore the features, and a premium subscription for advanced functionalities and enhanced security.
- The platform is designed to be fully responsive, ensuring seamless access and usability across all devices, including desktops, tablets, and smartphones.
- Admins have full control over the platform, including user management, document monitoring, and advanced settings, ensuring smooth operations and security.
- "Sign Track" provides robust customer support to assist users with any queries or technical issues, ensuring a smooth and hassle-free experience.

XO Black

Technology: React js, tailwind, Laravel

- XO Black powers a massive digital ecosystem offering services like barbers, groceries, events, directories, food delivery, and social networking.
- It centralizes control for businesses to manage and promote their services from one platform.
- The platform supports global users, enabling access and service delivery without geographical limits.
- Offers both free trials and premium plans for flexible usage and scalability.
- Includes a powerful admin panel for full control over users, services, and operations.
- Handled role-based access and secure API endpoints with JWT and middleware layers.
- Leveraged Socket.IO for instant chat updates, typing indicators, and read receipts.
